
Vanguard Project

— Jordi Díaz Carné —

Introduction

Vanguard believed that a more intuitive and modern User Interface (UI), coupled with timely in-context prompts (cues, messages, hints, or instructions provided to users directly within the context of their current task or action), could make the online process smoother for clients.

Control Group

VS

Test Group

Data Overview

1. **Client Profiles** \Rightarrow Demographics like age, gender, and account details of our clients
2. **Digital Footprints** \Rightarrow A detailed trace of client interactions online (pt1 + pt2)
3. **Experiment Roster** \Rightarrow A list revealing which clients were part of the grand experiment

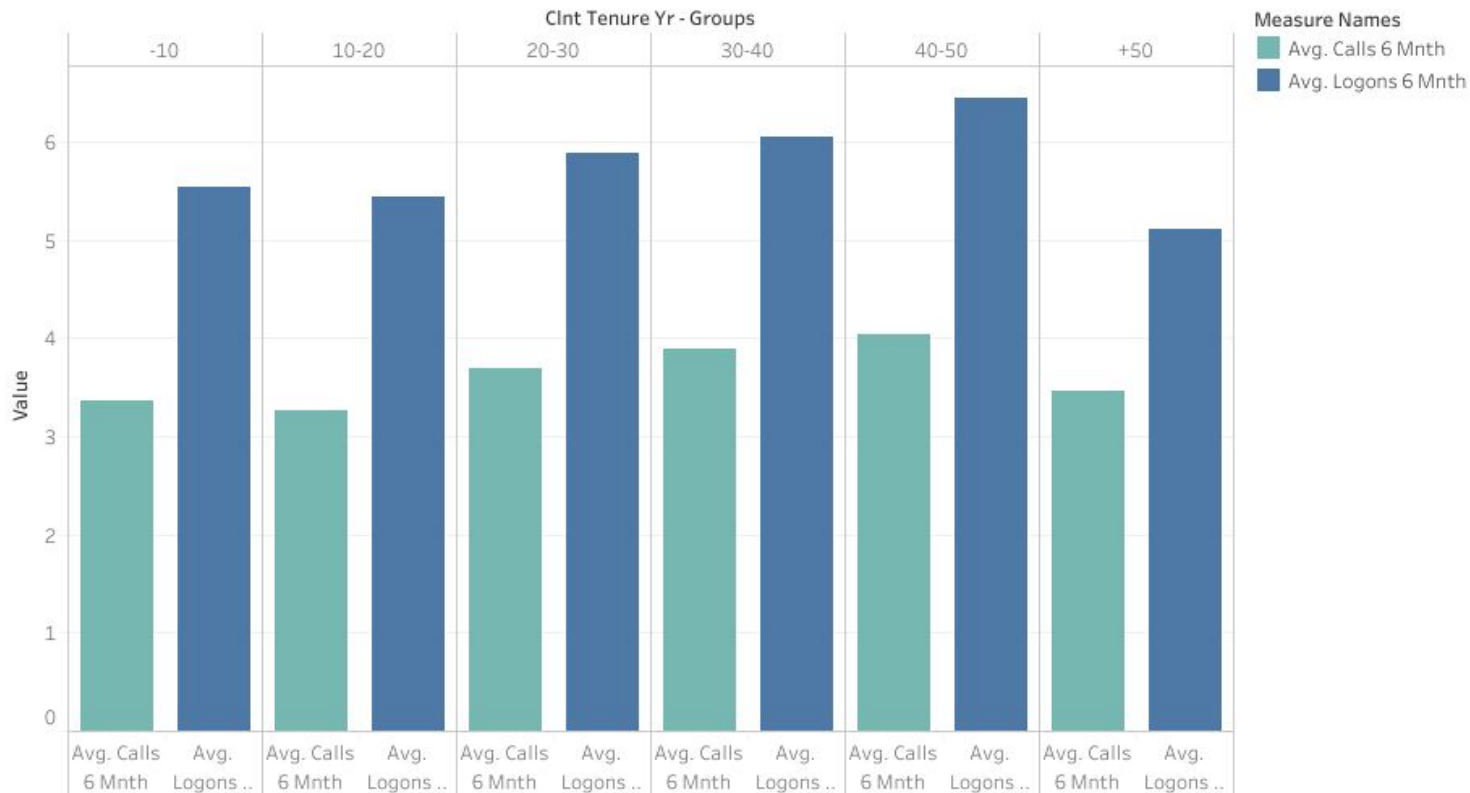

Exploratory Data Analysis (EDA)

Exploratory Data Analysis (EDA)

Hoja 13

Hypothesis Testing

$H_0 \Rightarrow \text{Completion rate Test} = \text{Completion rate Control}$

$p_value \Rightarrow 5.4191119513108185e-104$

$H_0 \Rightarrow \text{The increase in completion rate is less than 5\%}$

$P_value \Rightarrow 4.931275766727138e-09$

Hypothesis Testing

$H_0 \Rightarrow \text{Age for Test} = \text{Age for Control}$

$P_value \Rightarrow 0.032328658834428904$

$H_0 \Rightarrow \text{Tnure_yr for Test} = \text{Tenure_yr for Control}$

$P_value \Rightarrow 0.08682473416066212$

$H_0 \Rightarrow \text{Gender does not affect engagement with the new or old process}$

$P_value \Rightarrow 0.3892352702565598$

Performance Metrics

85% make it to the end

Tableau Visualizations

Challenges & Learnings

- Find the average time in each step
- Learn how to get the most out of Tableau
- Load data from 'Experiment Roster' to SQL
- English

Conclusion

Older people have greater balance but at the same time they are the least attracted to the new user interface

The steps where people spend the most time are the first and the last and therefore they are the most decisive. And this is where the new user interface performs better

Focus on trying to bring the new user interface closer to people over 50 years old

Thank you for your time!
